General astonishment is expressed that the New York World does not explain Tilden's income tax perjuries. What, it is asked, is the use of keeping an arithmetic man if he can't tackle such jobs as this?

The NorthReld Robbers.

Four of the band of robers who in broad daylight the other day rushed into Northfield, Minn., and whilst atcashier, have come to grief, as the fol-

lowing dispatches will show. St. Paul, Sept. 21.—the Pioneer had them out on the prairie and open-ed fire on them. The robbers reed fire on them. The robbers re-turned fire, but kept working toward the river, and at last got there and hid in the bushes. By this time our men were all together and surrounded the bush the robbers were in, and the firing became general. Our men were ad-vancing all the time. At last the robbers saw there was no use, and gave up. One was killed and the other three wounded The one that was supposed to be Cole The one that was supposed to be Cole Younger was wounded badly in the hand and back. It is thought that one perhaps two, will die of their wounds.

A special from Sioux City says that two of the robbers who were chased into Dakota were overtaken by a citi-zens posse six miles above Yankton to-day. The robbers, when sighted, turned and fired, wounding one of the pursuer's horses, and then took to the woods and were again lost track of. The hunt is being continued, and it is thought will certainly end in running the band down.

The wounded robbers have confessed to the sheriff having them in charge that they are the Younger brothers but

THE GRASSHOPPER DE-SCRIBED.

The grasshopper as a champion mul-tiplyist has no equal. He lays (speak-ing generically and not to put too fine a point on it) an egg which is about the size and shape of a long primer 0. In fact he lays several of them. From August 1 until winter he is actuated by August I until winter he is actuated by a reckless smbition to bore holes in the ground, of a pipe stem, and then to fill these holes with cream colored 00. And though he is small he attends to his bix, and is a triumphant success. In stature he is about a match fos a sixpeany stub nail and formed like unto a lynchpin, and he wears a green scaling wax head on him and a pair of glass eyes, so that with his long tailed duster on he looks like an unsophisticated and near-sighted schoolmaster. But unsophisticated isn't what's the matter with him. And numeration is his best mathematical hold. He will stand himself bolt upright like a peg in one of those holes aforesaid, and view the heavens with an air of sublime serenity and wooden-headed unconsciousness.

Don't you fool yourself—He knows just what he is about. He prefixes him-self like a figure 1 in the business, and, adopting the decimal system of notaself like a ngure I in the obsiness, and, adopting the decimal system of notation, calmly places a 0 where it will do the most good. That stands for 10, and before you can dot and carry one he has added another cipher to that, and he now reads 100. About this time you begin to discover what sort of a rooster he is, and you entertain a degree of awe for him not inspired by a tront view of his green goggles. Reasoning a posteriori you discover that he is a dangerous neighbor. But while you stand amazed he rapidly suffixes fifteen or twenty more 000, carrying his problem into the million millions, and has sealed and cemented it up ready to be fired at you next spring. In two minutes and a quarter he has given you a problem that with all your powers of multiplication cannot be solved or eincidated. He compounds his interest a hundred per cent. every five seconds, puts a snap judgment on five seconds, puts a snap judgment on your cornfield, and forecloses before you can say Jack Robinson.—Fergus Falls (Minn.) Journal.

HARPER & BROTHERS, New York "A Repository of Fashion, Pleasure, and In-HARPER'S BAZAR.

ILLUTSRATED. Notices of the Press Notices of the Press.

The Bezer is edited with a combination of tact and talent that we selicon find in any journal; and the journal itself is the organ of the great world of fashion — Botton Traveller.

The Bezer commends itself to every member of the household—to the children by droll and pretty pictures, to the young ladies by its fashion-plates in entiless variety, to the provident matron by its patterns for the children's clothes, to paternamilias by its insteful designs for embroidered slippers and luxurious dressing yowns. But the reasing matter of the Bezer is uniformly of great excellence. The paper has acquired a wide popularity for the firstide enjoyment it affords.—B. F. Evening Post.

In its way there is nothing like it. Fresh and essays, its poetry and equits, are all invigorating to the mind.—Chicago Evening Journal.
